Infrared Illuminator Fully adjustable

Videolarm's IR200-36 infrared illuminator provides nighttime surveillance for low-light applications. Constructed out of a lightweight, rugged, weather-resistant housing, the device illuminates areas up to 660 feet. Users can manually adjust the beam angle from 30, 45 and 60 degrees. The product is equipped with LED technology that requires low power to operate and a 20,000-hour lifecycle. *Videolarm*.

IP Network Products Open architecture

Honeywell's EQUIP™ series of IP network products is composed of cameras, encoders, NVRs and DVRs. With an open

architecture and single API, the line works across IP-based systems. The cameras are available in PTZ, mini-dome or box style. The cameras transmit images over longer distances and are capable of delivering video at 30 fps at 4 CIF for real-time, high-resolution video recording. A sabotage feature detects a change in the field of view or focus and instantly notifies the operator if a camera has been blinded or vandalized. *Honeywell*.

Intelligent Video Management Unifies IP and analog video

The VideoSphere Intelligent Video Management solution from March Networks facilitates transitions to an all-IP video infrastructure. The solution includes integrated video and system management software, analytic applications, IP cameras, encoders and networked recorders. A series of hybrid recording platforms enables organizations to enhance existing video infrastructure capabilities with advanced analytic applications and standard and megapixel IP cameras. *March Networks*.

DVRs High-compression technology

Mace's new RT2 series DVRs offer high-compression technology for better performance in all commercial and residential applications. Mace's recorders come with a 250 GB hard drive (expandable to 4 TB) and continuous recording time of up to 30 days. The DVR also has the option to be connected to the Internet and includes a built-in Sony CD burner (upgradable to a DVD burner). Models are available in four-, eight- and 16-channel options. They come with a mouse and remote control. *Mace*.

Camera Power zoom

The SCC-C6403 SmartDome camera is designed for advanced surveillance needs at a competitive cost. Its 32x optical and 10x digital zoom—for a total of 320x magnification—lets users observe activity from a great distance. The dome includes 360-degree panning and is designed for wall-mount and corner-mount applications. It's available with a variety of mounting and housing options for indoor and outdoor applications. Features include true day/night operation with removable mechanical cut filter, motion detection, privacy zones, auto focus and auto white balance. *SAMSUNG / GVI Security*.
