

# 8500 Series Electric Strike Body

*Works with mortise locksets  
without a deadbolt up to  
a 3/4" throw latchbolt*

Also available in  
Complete One Box  
Solution

## The fire-rated, concealed electric strike solution for mortise locksets.

The HES 8500 series is a fire rated, compact, high performance electric strike featuring a unique concealed design for use with mortise locksets without a deadbolt. Designed for fast, convenient installation, the 8500 installs with little or no modification to the frame. Simply remove the existing strike plate, remove the dust box and install. Its strength is derived from a unique keeper pin locking design, enabling the 8500 to exceed Grade-1 ratings. This unique electric strike complies with NFPA 80-07 guidelines for retrofit into fire rated frames. The 8500 accommodates mortise latchbolts up to 3/4" throw.

## Features

- No cutting to the face of the frame
- Stainless steel construction
- Tamper resistant
- Static strength 1,500 lbs
- Dynamic strength 70 ft-lbs
- Endurance 1,000,000 cycles
- Field selectable fail secure/fail safe
- Non-handed
- Metal or wood frame
- Internally mounted solenoid
- Accommodates 3/4" mortise latchbolts
- Strike body depth 1-5/16"
- Plug-in connector
- Full pocket shims for horizontal adjustment
- SecuriCare five-year, no-fault, no questions asked warranty (Addition of SMART Pac® III extends the warranty to 10 years)

## Options

- LBM - Latchbolt Monitor
- LBSM - Latchbolt Strike Monitor
- 4 faceplate option kits to work with most mortise locksets (sold separately)

## Accessories

- **150** Strike Latch Guard
- **2005M3** SMART Pac® III
- **2001M** Plug-in Bridge Rectifier
- **2004M** ElectroLynx® adapter
- **2006M** Plug-in Buzzer

## 8500 Series Electric Strike Body

### Certifications

- ASTM E152 Fire Door Compliant
- ANSI/BHMA A156.31, Grade 1
- NFPA 80-07 Compliant
- NFPA-252 Fire Door Compliant
- RoHS Compliant
- UL 10C Fire Rated
- UL 294 Listed
- UL 1034 Burglary-Resistant Listed and Suitable for Outdoor Use

### Specifications

#### Frame Application

- Metal
- Wood

#### Electrical

- Dual voltage 12 or 24 VDC/VAC
- 240 mA at 12VDC
- 120 mA at 24VDC
- DC continuous duty/AC intermittent duty only
- PoE friendly

### Dimensions

Removal of the dustbox required for use with ANSI/BHMA A156.115 prep

NOTE: Electric strike compatibility is determined at time of electric strike product release. ASSA ABLOY is not responsible for incompatibility of products that have changed in design or craftsmanship by their respective manufacturers. When compatibility is a concern, contact Customer Support for application assistance.

# 8500 Series Faceplate Option Kits

The 8500 faceplate option kits combine two different faceplate pocket styles with three different deadlatch platform profiles for compatibility with a wide variety of mortise locksets. 8500 faceplate option kits are lock specific. There are two faceplates included in each kit: a standard faceplate and a faceplate with a wider pocket to address less-than-ideal sagging door conditions.

## Get to Know the 8500

The 8500 concealed electric strike for mortise locksets builds on the tradition of ground-breaking design you've come to know in the 8000 Series concealed electric strike family. It has a unique design unlike any electric strike on the market today. It's important to understand the extraordinary design of the 8500 so that you can correctly install and operate it.

When the door is closed, the mortise latchbolt is held secure by the 8500 keeper. A 'deadlatch platform' insert holds the deadlatch in its locked state. Place the deadlatch platform into one of three locations in the strike as appropriate for the type of mortise lockset.

When the electric strike is energized, the keeper begins to rotate and the deadlatch platform falls away, allowing the deadlatch to drop and the latchbolt to become locked.

As the door moves forward, the latchbolt slides first along the keeper and then up the internal ramp.

As the door continues along its arc away from the frame, the latchbolt and deadlatch exit the 8500, which quickly returns to its locked state.
